Ainur Karimov

Machine Learning Engineer Kazan, Russia

ainureg@ya.ru | ainureg.github.io/cv | LinkedIn | Telegram | GitHub

Machine learning engineer with a background in mathematics. I work with computer vision, medical imaging, geospatial data, and robotics — taking models from research and hypothesis testing to production.

Experience

TTK Digital May 2025 — present
Machine Learning Engineer

- Work on machine learning and robotics.

Avtodoria Feb 2025 — Feb 2026
Computer Vision / Data Scientist

- Worked on SLAM and monitoring with Grafana.

Innopolis University Feb 2022 — Dec 2024
Machine Learning Engineer

- Worked on cancer recognition and semantic segmentation of medical images using PyTorch and DICOM.
- Contributed to selected AI Radiology modeling tasks.
- Presented the team's cancer recognition model at Inno Onco 2024, Moscow.

Avtodoria Jul 2019 — Feb 2022
Computer Vision / Data Scientist

- Developed segmentation models for CitySoft and worked on geometric measurements and projections.
- Processed images and geospatial data; helped bring deep learning solutions to production.

Maxima Sep 2017 — Oct 2018
Data Scientist

- Conducted statistical research and hypothesis testing; automated Bayesian analytics.

Publication

Co-author. Artificial Intelligence for Tumor Tissue Detection in Stomach Cancer: A Retrospective Algorithm Development and Validation Study
Journal of Clinical Medicine · 28 April 2026 DOI: 10.3390/jcm15093370

Education

MIPT 2022
MSc · Phystech School of Aerospace Technology

Kazan Federal University 2014
BMath · Institute of Mathematics and Mechanics, Theory of Functions and Approximations

Big Data Academy MADE
Three semesters covering algorithms, geospatial analysis, graph ML, MLOps, and Bayesian machine learning.

Skills and languages

Models & data: PyTorch, OpenCV, scikit-learn, pandas, GeoPandas, DICOM

Engineering: Python, SQL, R, C++, Linux, Git, Docker, pytest, CI/CD, MLOps

Languages: Russian · C2 / English · B2 / Tatar · B2 / Turkish · B1 / Spanish · A1
