GitHub

Skills

Models & data: PyTorch, OpenCV, scikit-learn, pandas, GeoPandas, DICOM

Engineering: Python, SQL, R, C++, Linux, Git, Docker, pytest, CI/CD, MLOps

Languages

Russian · C2 / English · B2 / Tatar · B2 / Turkish · B1 / Spanish · A1

Education

MIPT
MSc · Phystech School of Aerospace Technology
2022

Kazan Federal University
BMath · Institute of Mathematics and Mechanics, Theory of Functions and Approximations
2014

Big Data Academy MADE
Three semesters covering algorithms, geospatial analysis, graph ML, MLOps, and Bayesian machine learning.

Profile

Machine learning engineer with a background in mathematics. I work with computer vision, medical imaging, geospatial data, and robotics — taking models from research and hypothesis testing to production.

Experience

May 2025 — present — Machine Learning Engineer — TTK Digital

- Work on machine learning and robotics.

Feb 2025 — Feb 2026 — Computer Vision / Data Scientist — Avtodoria

- Worked on SLAM and monitoring with Grafana.

Feb 2022 — Dec 2024 — Machine Learning Engineer — Innopolis University

- Worked on cancer recognition and semantic segmentation of medical images using PyTorch and DICOM.
- Contributed to selected AI Radiology modeling tasks.
- Presented the team's cancer recognition model at Inno Onco 2024, Moscow.

Jul 2019 — Feb 2022 — Computer Vision / Data Scientist — Avtodoria

- Developed segmentation models for CitySoft and worked on geometric measurements and projections.
- Processed images and geospatial data; helped bring deep learning solutions to production.

Sep 2017 — Oct 2018 — Data Scientist — Maxima

- Conducted statistical research and hypothesis testing; automated Bayesian analytics.

Publication

Co-author. Artificial Intelligence for Tumor Tissue Detection in Stomach Cancer: A Retrospective Algorithm Development and Validation Study

Journal of Clinical Medicine · 28 April 2026

DOI: 10.3390/jcm15093370
